Rapid
O/E
Order Entry

www.baass.com

BAASS develops and markets software solutions which greatly enhance the speed at which data can be entered into different modules of the Sage Accpac ERP Series.

Rapid Order Entry

Rapid
O/E
Order Entry

Enter new and repeat sales orders significantly faster into Sage Accpac. Add unlimited concurrent order entry users to ERP 100, 200, or 500.

How fast is your business moving?

Select from three unique types of customer history; item history with historical prices, item history with current prices, and invoice history with invoice drill down. Leverage your data by drilling down to invoice items and prices.

The ease of cloning existing orders with new order numbers makes it simple to plan ahead. Take the routine work out and save your valuable time.

No more intermediary print dialogs! Discover rapid printing of standard and custom reports with the touch of a button.

For the first time ever review all previous prepayment history prior to setting up authorizations for orders. Imagine viewing your customers in real time and making decisions that improve all facets of your business.

Act now and **receive a complimentary copy of Rapid Order Entry** for one user. Contact us at 877.462.3648 for a **free installation and training** session!

Additional user license \$700 + 18% for 1 year of Software Assurance, is required with purchase. This will allow you to run on the latest software version without paying upgrades and every time we release a new version we will automatically send it to you.

BAASS
Business Solutions Inc.
Bringing Technology to Business

"Rapid Order Entry integrates perfectly with Accpac and has allowed us to make more timely decisions and **meet the demands of our changing clientele faster than even we ever imagined.**"

Jamie Smith, President
Lanetco Computer Networks Inc.
