

# 10 Reasons To Maintain Spire Software Assurance

Spire Software Assurance adds value to your Spire investment

**Spire Software Assurance adds value to your Spire investment. It allows for your Spire not only to be current but also to be well secured for updates and fixes that are released throughout the year.**

Spire Software Assurance allows your business to maximize your use of Spire with the most contemporary features as they become available. When your company does not maintain its Spire Software Assurance, having to catch up from the previous version not only can be expensive but risky for the integrity of your software.

As operating systems get updates, one of the most important parts of our job is to ensure that Spire remains compatible with changes we see in the Windows world. Spire Software Assurance offers you peace of mind that your business can always upgrade and be consistent with your operating system.

## What do Spire users get when they are on an upgrade plan?

- 1 You will always have the latest version of Spire that will support the latest version of Microsoft operating systems.
- 2 New features designed to help your day-to-day workflow.
- 3 Fixes that are developed to address any issues found in Spire.
- 4 Online notifications on when upgrades and fixes are available.
- 5 Access to the Spire Customer Forum. A designated place where Spire users can reach out to their peers for advice or shared knowledge.
- 6 Access to Spire Academy (*full 9 module Spire Academy courses complete with lectures and quizzes*).
- 7 Access to Spire Web (*browser-based Spire applications, access Spire anytime, anywhere from any device*).
- 8 Security Upgrades.
- 9 Support is easier for your Spire Partner.
- 10 An annual fee is more manageable to budget versus an unexpected expense.

***For more information on how you can purchase Spire Software Assurance or get back on plan, don't hesitate to get in touch with your Spire Partner.***
