

Tipalti—We Handled It!™

End-to-End Global Payables

Our Origin Story

Tipalti began in 2010 when digital networks lacked the technology to manage mass payments to global partners. By creating a platform that automated this complicated process, Tipalti saved them time and helped them avoid hiring additional headcount.

We quickly discovered it wasn't just digital networks that could benefit from our technology. Whether you have an invoice-based workflow or a digital business model, **every growing company** needs an intelligent, holistic approach to eliminating payables friction. That's why we're here.
