

DEVELOPMENT

WEB QUERY TOOL

ABOUT

BAASS Web Query and reporting tool allows the client to tap into their data in real time mode while protecting and securing access to confidential data. There are 2 license versions of this product - developer and runtime. You can create your own database connections and queries or let BAASS do that for you so you can simply use the query to extract your own custom reports.

FEATURES

- › Connects to many SQL databases
- › Provides real time data
- › Allows drag and drop data filter/sort capabilities
- › Can export data to excel for formatting

BENEFITS

- › Real time access to your data on web (don't have to be connected to your application) this is governed by security set-up
- › Export data into Excel for personalized formattin

Experience an array of development tools designed by our very own BAASS team to support your specific business needs. These innovative tools bridge the gap between your organization and its success.
