WAREHOUSE MANAGEMENT SYSTEM

We Make Warehouses
Work Better!

▣ Accuracy ▣ Efficiency ▣ Oversight

About GraniteWMS

GraniteWMS is an end-to-end Warehouse Management System purpose built and versatile, for all mid-market warehouse requirements.

It is a flexible software solution that is centred around barcode scanning. By enabling the simple and accurate completion of all warehouse tasks, it gives you full traceability of all items in your warehouse.

We have implemented GraniteWMS at over 240 sites around the globe, in a variety of different industries.

GRANITE

What do **you** want?

Drive process adherence, it all starts with formalizing processes.

Eliminate admin slog, especially data capture and hand written forms.

Remove wasted time and increase throughput.

See true figures with accurate stock and granular data.

Measure and manage the performance of your people.

Implement rapidly with minimum disruption.

Experience our legendary service and support.

Benefit from our flexibility to change the system as your business changes.

Accelerate and grow your business like never before.

GRANITE

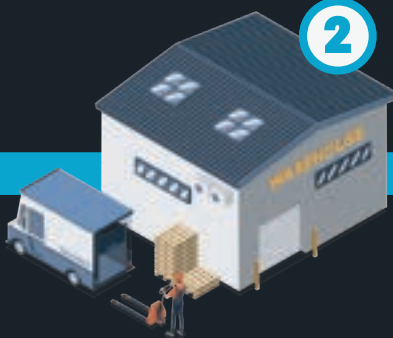

The GraniteWMS Journey

GraniteWMS helps to manage and streamline every process in your warehouse, providing simple step-by-step instructions for every transaction and creating a seamless end-to-end view of your operation.

**1**

Item Setup

Record custom fields for each item.

**2**

Location Setup

Identify unique locations in the warehouse.

**3**

Receiving Stock

Validate and label stock as it is received.

**6**

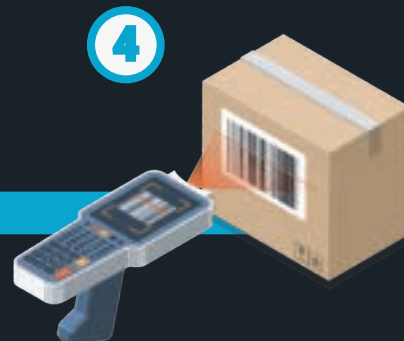

Stock Control

Location, scanning, adjustment, quantity and unit management.

**5**

Stock Take

Scan individual items or bulk enter quantity.

**4**

Put Away & Replenishment

Stock is scanned into a designated location and replenished from bulk.

**7**

Picking

Custom pick-slips and simple progress dashboard.

**8**

Packing

Items scanned against packing manifest and waybill automatically produced.

**9**

Reporting

End-to-end traceability of every item with a full transaction log.

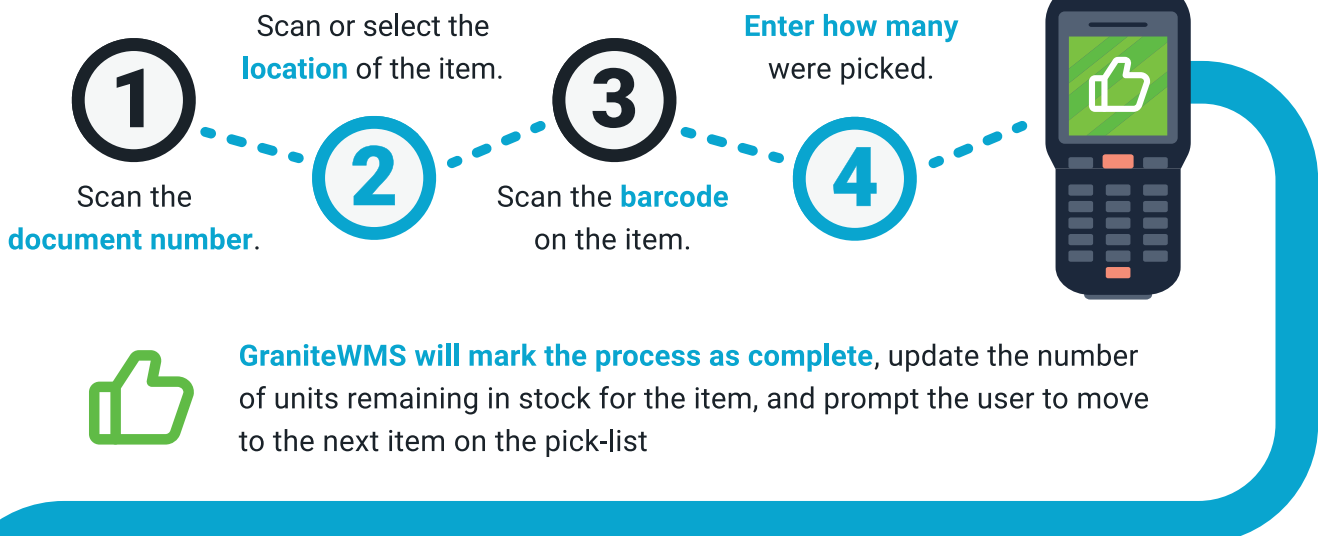

**GRANITE**

How it Works

GraniteWMS uses **barcode scanning** to guide users through various warehouse processes.

For example: **The picking process**

Interface in Detail

The **GraniteWMS interface** contains all the details needed to complete each process and will prompt the user through every step.

- 1 **Current Process.**
- 2 **Notification Bar** (eg: error / final step in process / transaction complete).
- 3 **Current Step** in Process.
- 4 **Input Field** - Scan barcode or type in relevant input.
- 5 **Document info** for the current process.
- 6 **Location** for current process.
- 7 **Quantity remaining** to be scanned in document.

GRANITE

What our **clients** are saying...

CUSTOMER : FE INGREDIENTS – Toronto **Respondent : Jay Capaldi - CFO**

Rating: 10/10 – The GraniteWMS product and support team have been outstanding. The implementation was incredibly well-coordinated and executed quickly, and their team has been proactive in troubleshooting and developing custom solutions for our needs.

The GraniteWMS support team stands out as one of the best I've worked with—responsive, solution-driven, and always willing to adapt to our unique requirements.

The system's flexibility and access to real-time data have been game-changers for us. It ensures process adherence while remaining user-friendly, making it easy for our team to adopt.

CUSTOMER : SUPPLYTEK/LAZERTONE – Pennsylvania **Respondent : Chris P – Operations Manager**

We are extremely happy with GraniteWMS! The system is intuitive, reliable, and integrates perfectly with our ERP. It enforces process adherence seamlessly, and the support team is outstanding—responsive, knowledgeable, and truly dedicated. **A solid 10/10!**

CUSTOMER : SCHLESS Bottles - New York **Respondent : Joel - Managing Director**

10/10! The best thing about using GraniteWMS is it's User Simplicity, Flexibility, Access to data, and Traceability, forcing process adherence.

My experience using GraniteWMS is it's super friendly to use, super friendly to manage the system, and the service behind it is absolutely amazing.

GRANITE

CUSTOMER : ORGANICS THAT DELIVER – San Francisco

Respondent : Mary Zuriakat Leonardo - Operations Director

10/10! Easy to use, straightforward, quick responses/fixes.

GraniteWMS made the transition quick and easy. Made sure everything went smoothly.

The best thing about using GraniteWMS is User Simplicity, Flexibility, Access to data, and Traceability, forcing process adherence.

CUSTOMER : SEAGULL INDUSTRIES - Cape Town

Respondent : Roelien Venter – Financial Manager

A solid 10 out of 10. Their responsiveness and availability are exceptional. The support team has demonstrated a remarkable ability to understand our unique operational requirements and has consistently worked towards implementing tailored solutions that align with our business objectives. Their commitment to delivering customized functionalities speaks volumes about their dedication to customer satisfaction and operational excellence.

The standout feature of Granite is the custom and tailored solutions that their team have developed for us. This speaks to its flexibility which is a critical advantage. GraniteWMS adapts seamlessly to our evolving business processes, allowing for effortless scalability as our operations grow and as we try to streamline operations.

Access to data is incredibly robust, providing real-time analytics and actionable insights that empower decision-making at every level.

CUSTOMER : BATA SHOES - Kenya

Respondent : Anthony Miano – IT Manager

10/10 - It does not overpromise and does not under deliver. And it works! That's what makes the product great. The support team are the human face of the product.

The Granite team sort the issues quickly, take time to understand the problem, resolve the problems and sometimes at odd hours! They work with the users closely to enhance the experience through knowledge transfer. From my perspective they are what makes using the product so easy. Way ahead of the pack on support!

From the perspective of an IT Manager, the visibility it has brought to our DC processes is a game changer for us. The sales teams and the DC teams are now more cohesive than ever. Evidence was the Highest figures of sales in the Bata Kenya business in any month were exceeded last December by a huge margin.

On the **mobile scanner or tablet in the warehouse** we keep things simple, but highly efficient.

This example shows the replenishment team exactly which locations need to be filled, and where to get the stock, including oldest Lot.

GRANITE

ERP Integration

Our system integrates fully with SAGE100, SAGE200, SAGE300, SAGE Intacct, Acumatica, CIN 7, and SAP Business One.

Many ERP and accounting systems are not built with the focus of a WMS system. By adding a barcode-based WMS to your accounting solution, you can create an end-to-end view of your operation, view real-time accurate data, and optimize your product delivery.

GRANITE

Why GraniteWMS?

Easy to Implement

GraniteWMS is a straightforward platform that can be installed and running in your warehouse in weeks, rather than months.

Simple to Use

GraniteWMS has a simple web-based application interface that sets up easy step-by-step processes.

Improves Accuracy

All transactions are based around barcode scanning, ensuring faster and more accurate picking and order fulfilment.

Easy to Maintain & Support

Our team will be there to assist you during the go-live and provide expert ongoing support.

Fit for Purpose

A lean solution for the mid-market business needs. You are not paying for complexity and functionality you will never use.

Highly Scalable & Configurable

The system can scale to fit the requirements of your warehouse, and is easily configurable to accommodate changes.

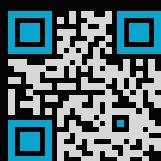

Live Data

GraniteWMS will deliver real-time, accurate data on all stock and transactions in your warehouse.
