

TrackTik Integration with HCM/Payroll and Sage Intacct

Developed by TrackForce and BAASS Business Solutions Inc.

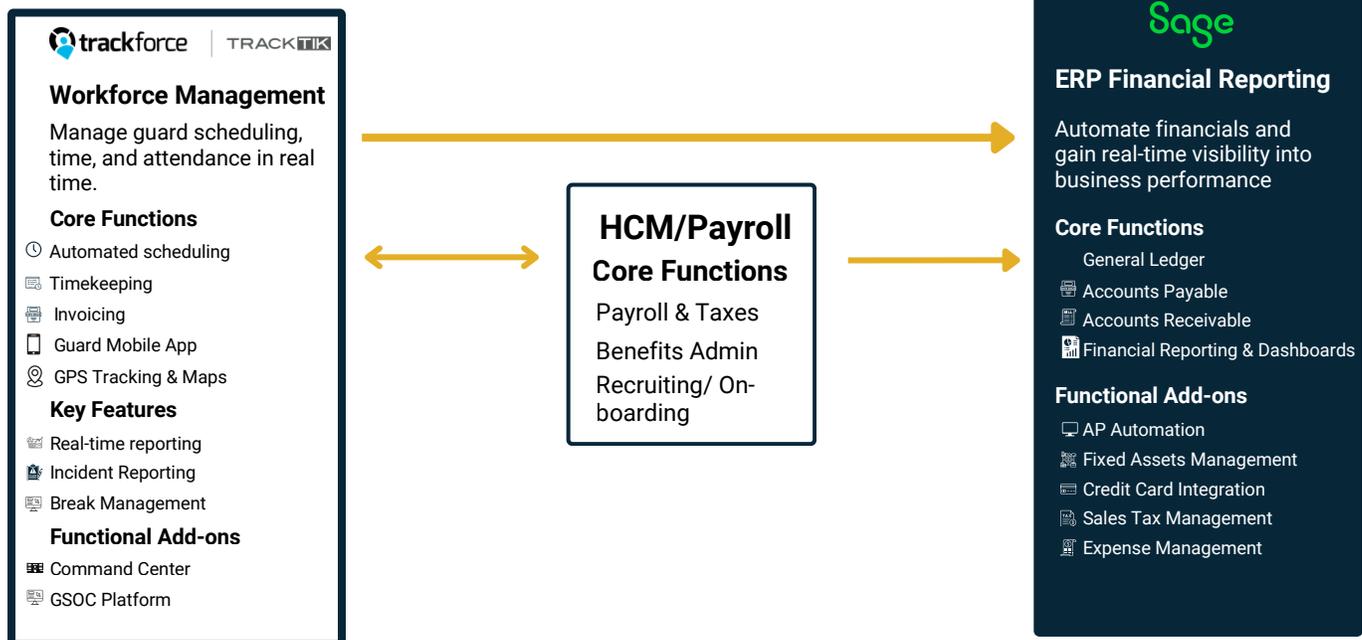

Purpose-Built Workforce Management, Payroll & ERP

Seamless integration for security services: from field operations to back-office and financial reporting

Sage Intacct - Built for Security Services

Security companies face complex contracts, labour-intensive operations, and thin margins. Sage Intacct is a best-in-class cloud-based financial management and accounting solution designed to help security service providers streamline back-office operations, reduce administrative burdens, and gain real-time visibility into performance.

Full integration with a custom chart of accounts, financial reports and dashboards from an industry experienced professional services team.
