

# TrackTik Integration with Sage Intacct

Developed by BAASS Business Solutions Inc.

## Connect your Guard Operations with Real-Time Financial Insights

Automate processes, gain visibility, and make smarter decisions with BAASS Business Solutions, Sage Intacct, and TrackTik.

### Sage Intacct - Built for Security Services

Security companies face complex contracts, labour-intensive operations, and thin margins. Sage Intacct is a best-in-class cloud-based financial management and accounting solution designed to help security service providers streamline back-office operations, reduce administrative burdens, and gain real-time visibility into performance.

### Key Benefits for Security Companies

**Dimension Based Reporting:** Create tailored dashboards and reports for smarter, fast decisions.

**Real-Time Profitability Tracking:** Monitor revenue, costs, and margins by service type, site, customer region, or project.

**Boost Profitability:** Monitor revenue and labor costs by site or client in real time.

**Stay Audit-Ready:** Maintain a complete, accurate financial history for clients and regulators.

**Scalable for Growth:** Support expanding operations without adding more admin burden.

### Extend Sage Intacct with Add-on Solutions

Sage Intacct offers a range of specialized add-on modules that help security companies expand the platform's capabilities.

**Accounts Payable Automation:** Automate approvals, payments, and vendor management to save time and reduce errors.

**Fixed Assets Management:** Track, depreciate, and report on vehicles, radios, and security equipment accurately.

**Credit Card Integration:** Simplify reconciliation and improve visibility into company credit card spending.

**Sales Tax Management:** Automate tax calculations and ensure compliance across multiple jurisdictions.

**Expense Management:** Streamline employee expense submissions, approvals, and reimbursements.

### Your Trusted Technology Partner for Over 35 Years

At BAASS Business Solutions Inc., we deliver tailored business solutions that optimize operational performance and drive sustainable growth.

For over 37 years, we've partnered with leading technology publishers and third-party providers to deliver industry-focused solutions. Our specialized teams of analysts, consultants, and technicians have completed over **5,000 successful implementations** of Sage and other solutions.

# TrackTik Integration with Sage Intacct

Developed by BAASS Business Solutions Inc.

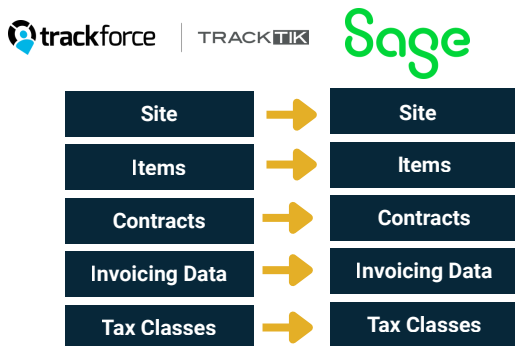

## BAASS Bridge

The BAASS Bridge connects your Sage ERP financials with critical security applications like payroll and HR, creating transaction batches for seamless processing. This ensures your back-office stays in sync with your workforce operations, giving you accurate, real-time insights.

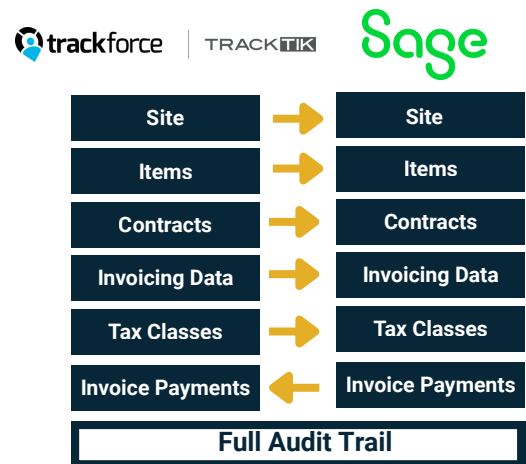

## Optimize Security Options with TrackTik

TrackTik is a leading security workforce management platform that streamlines guard scheduling, site management, activity tracking, and billing from one centralized dashboard. Our Integration bridges security operations and finances to reduce errors, eliminate costs, and maximize margins.

### Bridge Standard Version

### Bridge Premium Version

## The Power of Sage Intacct & TrackTik

**Single Source of Truth:** All customer and contract details, site information, requirements, and project services are captured and synced to both systems.

**Automated Billing:** Keep track of operational details for invoicing customers.

**Advanced Project Tracking & Real-Time Dashboards:** Track metrics that matter with advanced dashboards and reporting. Stay informed on project margins, employee hours, compare budget vs actuals, and access utilization and operational reports.

## Key Benefits for Security Companies

**Save Time:** Automatically accurately sync Sites, Contracts, Items, and Invoices between TrackTik and Sage Intacct.

**Instant Visibility:** Understand the financial impact of guard hours, overtime, and contracts in real time.

**Audit-Ready:** Maintain a full, traceability history of financial data exchange.
